Memorandum to: Genomics and Cell Characterization Core Facility (GC3F) Users

From: Doug Turnbull, Director Genomics and Cell Characterization Facility (GC3F) and GC3F Faculty Advisory Committee

CC: David Conover, Vice President for Research and Innovation (VPRI)
Leslie Leve, Assoc. VP for Research, (VPRI)
Melodi Jayne, Business Manager, Research Core Business Services, (RCB)

Re: FY 2019 sequencing rates

The Genomics and Cell Characterization Core Facility (GC3F) annually adjusts its sequencing rates after carefully reviewing costs and facility usage levels with the help of the Research Core Business Services (RCBS) team. The rates were recently reexamined by the GC3F and RCBS, and we determined that no rate adjustment is needed to allow us to deliver sequencing services to our users at the lowest possible cost while maintaining the financial sustainability of the GC3F over the next fiscal year.

Sequencing rates for the next fiscal year (FY19) are listed on page two of this memo. If you have any questions regarding our new rates, please don't hesitate to send an email to dturnbul@uoregon.edu or call 541-346-5170.

Sincerely,
Doug Turnbull
