

UNIVERSITY OF OREGON

Memorandum

Date: March 24, 2017

To: Genomics and Cell Characterization Core Facility (GC3F) Users

From: Doug Turnbull, Director Genomics and Cell Characterization Facility (GC3F) and GC3F Faculty Advisory Committee

Cc: David Conover, Vice President for Research and Innovation (VPRI)
Bill Cresko, Associate Vice President for Research, (VPRI)
Stacy Williams-Wright, Divisional Budget Director, (VPRI)
Melodi Jayne, Business Manager, Research Core Business Services, (RCB)

Re: FY 2018 sequencing rate adjustments – rate decrease

The Genomics and Cell Characterization Core Facility (GC3F) annually adjusts its sequencing rates after carefully reviewing costs and facility usage levels with the help of the Research Core Business Services (RCBS) team. The rates were recently reexamined by the GC3F and RCBS, and we determined that a rate decrease is warranted in order to deliver sequencing services to our users at the lowest possible cost while maintaining the financial sustainability of the GC3F.

After carefully reviewing RCBS projections for FY18, the GC3F and its Faculty Advisory Committee recommend decreasing internal sequencing rates by 5% and decreasing external sequencing rates by 2%, effective July 1, 2017. These rate changes were brought to the Vice President for review and approval.

The adjusted sequencing rates are listed on page two of this memo. If you have any questions regarding our new rates, please don't hesitate to send an email to dturnbul@uoregon.edu or call 541-346-5170.
